

To Whom It May Concern:

I use the weather and traffic channels all of the time on my xm radio. Where I live I am unable to get local traffic and weather reports from such places as New York City and the ability for me to receive these on my XM Radio has been huge for me.

Secondly I pay for XM radio, and should get the same services and in my opinion even better services, then someone listening to traditional radio. I love what XM provides, and if you prevent XM from carrying weather and news it would be an injustice.

Sincerely,
Brandon Wood
